WHAT IS THE RATIONALE FOR USING FIX MMT?

Improving post-trade transparency

Source: Refinitiv

Why do we have FIX MMT?

- **Purpose:** MMT is an efficient operational solution for fulfilling trade flagging, incl. respective regulatory requirements.

It became a de facto standard for trade reporting across all equity and part of non-equity markets, predominantly in Europe.

- **Benefits:** MMT delivers unambiguous post trade transparency information, that is created at the source, and which may flow (e.g. STP) along the full market data value chain.

MMT supports fully electronic processing of consistently flagged data points without the need for local reinterpretation/mapping of the same events across different sources. It improves data quality and reduces cost.

Post-trade transparency typically informs about ...

- the **validity of the transaction information** (e.g. a cancellation).
- the **trading venue** the execution took place on.
- the type of **market mechanism** used to perform liquidity pooling.
- the type of interaction between the buyer(s) and seller(s), and if it was of a **bilateral or multilateral** nature.
- the level of **pre-trade transparency** which was available before the execution.
- the level of **timestamping** accuracy is available for determining the exact sequence of executions.
- the **immediacy or deferral of the trade publication**.

Components of post-trade transparency

```
MessageName = Trade Type = TR
Version = 100

Efficient MMT string in Refinitiv Realtime feed using MMT_CLASS field (available in desktop too).

Refinitiv uses “?” in a position of the string where the value is not known from the venue.

WHAT HAS CHANGED WITH THE LATEST RTS 1 / RTS 2 REVIEW?

Trade Flagging modifications driven by regulation

Amended EU RTS 1 and RTS 2 provisions for MMT v4.0

- New Market Mechanism “Hybrid System” (RTS 1 and RTS 2)
- ‘CONT’ flag to be added (RTS 1)
- ‘PORT’ flag to be added (RTS 1 and RTS 2)
- Combinations of ‘PRIC’, ‘CONT’, ‘PORT’ permitted
- Combination with ‘NPFT’ is excluded
- Amended “NPFT” definition (RTS 1 and RTS 2)
- ‘TNCP” flag to be deprecated (RTS 1)

See ESMA70-156-4944

New separate Market Mechanism “Hybrid System”

5	Hybrid system	A system falling into two or more of the types of trading systems referred to in rows 1 to 4 of this table.	<p>For hybrid systems that combine different trading systems at the same time, the requirements correspond to the pre-trade transparency requirements applicable to each type of trading system that forms the hybrid system.</p> <p>For hybrid systems that combine two or more trading systems subsequently, the requirements correspond to the pre-trade transparency requirements applicable to the respective trading system operated at a particular point in time</p>
6	Any other trading system	Any other type of trading system not covered by rows 1 to 5.	Adequate information as to the level of orders or quotes and of trading interest in respect of shares, depositary receipts, ETFs, certificates and other similar financial instruments traded on the trading system; in particular, the five best bid and offer price levels and/or two-way quotes of each market maker in that instrument, if the characteristics of the price discovery mechanism so permit.

RTS 1 & RTS 2 (versus a display-only)

Level	Full Name	Options		MiFID II Equivalencies or Util		
		ESMA Stipula	Display Code	Trade Flag	RTS 1 (equity)	(not equ)

New flags: Portfolio (PORT) and Contingent Transaction (CONT)

Table 2 SUMMARY OF ESMA'S PROPOSALS REGARDING THE VARIOUS LISTS OF NON-PRICE FORMING TRANSACTIONS

Short name	Types of transactions	Art 2 of RTS 1 (STO)	Art 6 of RTS 1 (NT3)	Art 13 of RTS 1 / Art 12 of RTS 2
Benchmark transactions	the transaction is executed by reference to a price that is calculated over multiple time instances according to a given benchmark, including transactions executed by reference to a volume-weighted average price or a time-weighted average price:	Exempted from STO (no change proposed)	Eligible for NT3 transactions (no change proposed)	Not exempted from OTC post-trade transparency (no change proposed)
Portfolio trade	the transaction is part of a portfolio trade	Exempted from STO (no change proposed)	Eligible for NT3 transactions (no change proposed)	Not exempted from OTC post-trade transparency (no change proposed)
Contingent trade (1)	the transaction is contingent on the purchase, sale, creation or redemption of a derivative contract or other financial instrument where all the components of the trade are to be executed only as a single lot	Exempted from STO (no change proposed)	Eligible for NT3 transactions (no change proposed)	Not exempted from OTC post-trade transparency (no change proposed)

Removal of Flag: Trade Not Contributing to Price Discovery (TNCP)

CONTEXT	ESMA/MMT FLAG	BACKGROUND
Price Discovery Process	<p>Remove existing flag [TCNP]</p> <p>MMT Level 3.8 Will be deprecated, but will remain in the model for backward compatibility purposes</p>	Overlap and confusion with the existing flag NPFT (Non-Price Forming Trade)

Amended FIX Recommended practices

- 'IGRP' new flag for Intra-Group transactions executed for administrative or position management purposes
- 'GIVE' new flag for RFMD give-ups transactions
- 'XBDT' new flag for trades reported more than once due to overlapping regulatory reporting rules in different jurisdictions

Main features of FIX MMT v4.0 data model

- Enlargement of data model beyond v3.04 data structure
- Decoupling of display and efficient encoding data structures
- Efficient Encoding data structure keeps the existing 14 positions of the MMT string

New Matrix for v4.0 Efficient encoding

(see excel file, [Tab «Efficient encoding» on FIX website](#))

- The efficient encoding for MMT v4.0 is backwards compatible with the efficient encoding for the preceeding version, MMT v3.04.

Position	Value	Applicable to MMT v3.04	Applicable to MMT v4.0	total number of display codes	Level 1	Level 2	Level 3.1	Level 3.2	Level 3.3	Level 3.4	Level 3.5	Level 3.6	Level 3.7	Level 3.8	Level 3.9	Level 3.10	Level 3.11	Level 3.12	Level 3.13	Level 4.1	Level 4.2	Level 4.3	Level 4.4	Level 5.1	Level 5.2	Level 5.3

7	O	N	Y	3						BENC						PORT		CONT									

Regulatory Initiatives in Progress

- The EU Commission to endorse the ESMA recommendations published on March 28 2022 → done with ESMA opinion on Dec. 19 2022 and adoption of the proposed amendments to MiFID Technical Standards by EC on Jan. 17 (formal Objection Period for European Parliament and EU Council until April 2023)
- ESMA plans a second wave of trade flagging requirements amendments within the next two years → out of scope for v4.0
- FCA has plans to review trade flagging requirements as well but has not communicated any timeline → out of scope for v4.0

WHAT YOU SHOULD REMEMBER ABOUT FIX MMT

What you should remember about FIX MMT

- FIX MMT delivers an operational solution for fulfilling trade flagging regulatory requirements raised by ESMA. Have a look!
- FIX MMT is suitable for all asset classes subject to MiFID/MiFIR.
- FIX MMT is an off-the-shelf industry solution and can be freely used without any licensing constraint.
- FIX MMT is protocol agnostic. It is supported in the FIX Protocol.
- FIX MMT v4.0 has been adapted to the latest trade flagging requirements further to MiFID/MiFIR RTS 1 and RTS 2 review.
- FIX MMT is a collaborative initiative; additional expertise is always welcome.
- Please submit your questions/comments to:

fix@fixtrading.org
