FIX Trading Community And GDF Bid To Build Messaging Gateway For Digital Assets

Finextra

The FIX Trading Community and Global Digital Finance have formed a joint working group with the aim of connecting buy-side trading desks with the world of tokenized assets.

The initiative, dubbed the FIX-FinP2P Protocol Interoperability Alliance, aims to upgrade existing financial infrastructure to seamlessly interact with distributed ledger technology by facilitating interoperability across traditional financial systems and blockchain-based platforms.

GDF, FIX Partner For Tokenization Interoperability

Ledger Insights

Global Digital Finance (GDF) and the FIX Trading Community have created a working group for the FIX-FINP2P Protocol Interoperability Alliance. FinP2P is a routing network aiming to provide an interoperability protocol between different blockchains that host tokenized digital assets. It was founded by JP Morgan-backed Ownera.
