11:40 **Inside the French Market**

Explore France's evolving market dynamics, looking at key trends, developments and insights shaping today's trading environment and what lies ahead.

12:20 **Evolution of Equities**

Equity markets are undergoing rapid transformation driven by rising retail participation, accelerating tokenisation developments and increasing demands for transparency. The session looks at how these forces are reshaping market structure, trading behaviour and the future infrastructure of equities.

Evolution of Fixed Income

Fixed income markets are entering a new phase of transparency-led change, with implications for pricing quality, automation and algorithmic efficiency. EU and UK consolidated tape progress sets an important backdrop, alongside emerging reporting frameworks that continue to influence how data, trading behaviour and market structure evolve.
